

Quang Minh Phan

MINNEAPOLIS, MINNESOTA
VIETNAMESE + ENGLISH

Computer Science student working at the intersection of machine learning research, computer vision, efficient AI, and practical AI systems.

EDUCATION

B.S. Computer Science
[University of Minnesota Twin Cities](#)
- Focus: computer vision, vision robustness, efficient deep learning, parameter-efficient fine-tuning, and AI systems.

EXPECTED MAY 2028
GPA 3.93 / 4.00

RESEARCH AND EXPERIENCE

Undergraduate Research Volunteer
[Ding Lab - University of Minnesota Twin Cities](#)
- Support a PhD-led AI hardware and systems research project through dataset preparation, output review, and quality control.
- Run and analyze computer-vision experiments while supporting reproducible research workflows.

MAY 2026 - PRESENT
MINNEAPOLIS, MN

Software Engineering Intern
[FPT Software](#)
- Built Mega-ASR Studio with FastAPI, React, Vite, and reusable local ASR inference.
- Implemented batch and single-file APIs, inference locking, validation, recording, previews, system status, and decode/memory error handling.

MAY 2026 - PRESENT
HO CHI MINH CITY, VN

PUBLICATION

The Shape of Noise
[Layer-Wise Perturbation Profiles for Diagnosing Vision Robustness - CTB at ICML 2026](#)
- Designed and ran ResNet-50 and ConvNeXt-Tiny experiments on CIFAR-10 and CIFAR-10-C; compared full fine-tuning, LoRA, layer subsets, multi-seed results, and parameter counts.
- Top-k LoRA on ConvNeXt-Tiny reached 92.57% corrupted accuracy with 0.04M trainable parameters.

CO-AUTHOR
COMPUTER VISION

SELECTED PROJECTS

NoteFlow AI
Transforms notes, audio, and scans into structured, reviewable documentation with OCR, ASR, source comparison, audit logs, and human review.
[React](#) / [TypeScript](#) / [Vite](#) / [ASR](#) / [OCR](#)

LOCAL-FIRST AI

AI Sign Language Recognition
Recognizes ASL hand gestures through MediaPipe landmarks, feature preprocessing, and k-nearest-neighbors prediction.
[Python](#) / [OpenCV](#) / [MediaPipe](#) / [scikit-learn](#)

REAL-TIME CV

TECHNICAL SKILLS

PROGRAMMING	Python, C++, Java
ML + VISION	PyTorch, scikit-learn, LoRA, fine-tuning, OpenCV, MediaPipe, model evaluation
AI APPLICATIONS	Local ASR, OCR, Ollama, document-processing workflows
WEB + RESEARCH	FastAPI, React, TypeScript, Vite, REST APIs, Git, LaTeX, multi-seed evaluation
